 Search terms...

QBR Total Quarterback Rating — a 0–100 score of a quarterback's overall contribution on every play.
Passer Rating A formula combining completion %, yards, touchdowns, and interceptions per attempt.
YAC Yards After Catch — yards a receiver gains after securing the ball.
DVOA Defense-adjusted Value Over Average — team efficiency compared to league average, adjusted for opponent.
EPA Expected Points Added — how much a single play changed a team's expected points.
Snap Count The number of plays a player was on the field for.
Red Zone Efficiency Percentage of trips inside the opponent's 20-yard line that end in a touchdown.
Third Down % How often a team converts third downs into a new set of downs.
Turnover Margin Takeaways minus giveaways over a game or season.
Yards Per Attempt Passing yards divided by pass attempts.

About Fourth & Stats

Fourth & Stats is a one-stop spot for football numbers — team rankings, player leaderboards, standings, and a glossary for the stats that aren't obvious. I built it because checking stats usually means bouncing between five different sites, and I wanted everything in one clean place.
